In view of CMV's policy of providing the best products possible, CMV reserves the right to change specifications and appearance without notice. Contact the sales department for exact specifications and dimensions. CMV manufactures over 100 ironer and folder models that are sold throughout the world.

## CMV Sharper Finish

4500 Augusta Boulevard  
Chicago IL 60651

The IFC is an ironer, primary folder, and cross folder that discharges the finished linen to a table on either the left or right side of the cross folder.

The IFCS is an ironer, primary folder, cross folder, stacker and discharge conveyor that delivers the finished and stacked linen to either the operators at the front of the ironer or the rear.

Left or right hand discharge is always determined by facing the front of the ironer. The discharge side of the cross folder can be converted in the field.

The drawing illustrates several features with dashed lines. This is because the location of these features can be changed to meet your specific needs. The bypass table at the rear of the cross folder is not supplied with each IFC but can be ordered separately. It is not required for operation if you choose not to use it. The rear bypass table allows you to use the IFC just as you would a separate ironer / folder but is not necessary and would give you more space if you need it. The bypass table can also be used as the rear receiving table for the ironer / primary folder if it is used without the cross folder.

If you ordered the IFC and are not using a stacker and conveyor, a table is provided in lieu of the stacker. The table extends 19" (483 mm) beyond the end of the cross folder conveyor and is 34.5" (876 mm) wide.

The stacker discharge conveyor shown on the drawing is the standard length. Custom lengths are available so this dimension may vary.

Access to the inside of the ironer / primary folder frames for maintenance can be done without moving the stacker or conveyor. The frame panels are hinged from the back of the frame.

The cross folder is provided with casters that allow you to easily set it in place and move it away from the ironer for repair if necessary.

The rear bypass table on the cross folder is optional and not included as standard equipment on the IFC/S.
