

CMV SHARPER FINISH

LSF2 SPREADER FEEDER MODEL LSF2-120, 132, 138

- The LSF2 One Person Spreader Feeder is a simple, compact, and efficient system designed against today's over-complicated world (one that keeps you guessing what buttons to push next on other spreader feeders).
- Physically tight design uses almost no extra room at all in your laundry.
- Unique spreader design maintains the quality spreading of rectangular linen on the LSF2 every time.
- Can be installed on Model 2000 or larger CMV Sharper Finish ironers, but is more specifically made for the IFC and IFCS (all-in-one) units and single space only Finish Master (with built-in primary fold) units in rear return mode.
- Allows one person to operate a total ironing system with feeding, ironing, folding, and stacking sheets or larger tablecloths.
- Will process all kinds of sheets (kings, queens, double, or single sheets) as well as rectangular table cloths larger than 5' (1.51 M) with no adjustments to be made.
- Stains and tears are easily viewed on spread linen by the operator.

LSF2 Spreader Feeder

MODEL LSF2-120, 132, 136 TECHNICAL DATA
