CMV Sharper Finish

Why Iron?

Unfinished linens can destroy the atmosphere of an otherwise well appointed room. "No-iron" linens were developed primarily for home use, where dryer temperatures

and spin cycles can be precisely set and the flat-work can be taken from the dryer in time to preserve an acceptable appearance. This degree of personal attention is not possible, even in the smallest of commercial laundry settings.

The Mini Rite

considerable more convenient and flexible than an outside service. CMV Sharper Finish ironers not only iron linen, but also gently stretch an dry it, all in one easy motion. This saves time, money, and energy.

Simplified Operation

CMV Sharper Finish products greatly simplify ironing. An operator can be trained to use one in a short period of time.

Linens to be ironed can be taken from the washer / extractor and placed on the ironer's automatic feed conveyor, which guides the linen accurately and at the correct speed to the polished steel heated drying roll (excessive moisture might require the linen to be placed in a dryer for a short time prior to ironing).

After passing over the heated roll, the ironed linen is deposited on a table conveniently located at the front of the machine. The linen can now be stacked, hanged, or folded for immediate use or storage.

We work hard to simplify our designs to make ironing easy. Operator training is faster, service is easier, maintenance costs less, energy consumption is reduced. CMV Sharper Finish allows you to run your business, not just your ironer.

Work to be ironed is gently pulled to remove any wrinkles before drying.

Automatic feed conveyor.

Polished, heated ironing cylinder.

Ironed work deposited here.

The ironing process of all CMV Sharper Finish ironers—and is considerably faster and easier. The padded pressure roll applies to produce that crisp ironed feel, and glossy shine to your linens. The moves wrinkles before the linen is firmly held against the heat with a CMV Sharper Finish designed ironer

Ironer Features

► Intelatrol® Monitoring System

Standard on all gas and electrically heated models. We all need to be reminded of things from time to time. Have you ever forgotten to lock a door or turn off a light? Well, your laundry operator could forget to turn off the heat to your ironer, wasting energy and creating a hazard. They cannot forget if they have a CMV Sharper Finish ironer equipped. The Intelatrol will shut off the heat after twenty minutes if your ironer is left unattended. A red light will indicate that the Intelatrol deactivated the heating system, greatly increasing the life of your ironer ribbons and padding—not to mention the safety!

► Many Models Available

The Mini Rite ironing surface is 36" (.9 m) wide. The Finish Rite is offered with a 48" (1.2 m) or 60" (1.5m) ironing width. The Impress model range is available 56" (1.4 m), 66" (1.6 m) or 82" (2.1 m) widths. All of these models are ideal for tablecloths, napkins, or pillow cases. Sheets and other large linens can be folded once and ironed. These models have millions and millions of hours of operation worldwide.

The Impress

“The Ironer People”

the results—are very similar to careful hand ironing. But con-
the right amount of pressure to smooth out wrinkles and pro-
ne CMV calendaring results in a gently pulling action that re-
ed cylinder for drying. Far more stretching and drying is done
than by comparable single roll chest ironers.

► Simplified

Made by “The Ironer People”. This is all we do and we do it well. You cannot find an ironer line on the market that is less complicated than CMV Sharper Finish. We work hard to simplify our design so you have less to worry about. CMV Sharper Finish ironers let you do more with less.

► Sturdy

The “**Mean-Green Machine**”. We use thick gauge metal with steel welded construction. This makes CMV Sharper Finish ironers stronger than any other machine in its class, insuring a long life and maximum return on your investment. The entire machine is finished with a high grade “**CMV Green**” colored machine paint enamel.

► Minimal Floor Space

Single Operator Models require minimal floor space. They can be placed against a wall, saving space in your laundry.

► Superior Finish

CMV Sharper Finish ironers deliver linen with that crisp feel and glossy finish that your customers expect.

All models can iron linen made from cotton, blended polyester / cotton, or all synthetic. Delicate fabrics such as silk can be ironed as well.

ss 950x66

► Safety

Most models are ETL approved. Safety features include front, rear, and side interlocked guards; 24V controls; full width hand guard; full width on/off switch cable; properly sized exhaust blower to vent moisture and harmful products of combustion; accurate thermostatic heat control with high temperature shutoff; high gas pressure shut-off switch; and numerous warning labels and instructions.

The Impress Model 950x82

► Training DVD

An instructional DVD is provided with each CMV Sharper Finish ironer. The DVD demonstrates proper installation, use, and maintenance.

► Heating

The Mini Rite is available electrically heated only. The Finish Rite can be heated by gas or electricity. The Impress models can be heated by gas, steam, or electricity. The gas heated models are equipped with the full width multi-port **H.O.T.™ (Hold On Temperature)** induced draft burner that evenly distributes the heat with a total of nine parts. Compare that to others burners using nearly fifty parts or those that heat oil with pumps and long piping to heat the ironer.

► Quality ironing

All CMV Sharper Finish ironers use Nomex® padding and ribbons with automated pressure regulation to iron, dry, and remove wrinkles.

Available Options

► Electrical Voltages

A wide variety of electrical voltages are available including 50 or 60 cycle, single or three phase.

► Tight space?

Can you get your new ironer into the laundry? We can! We offer two options to solve this problem. We can either build a special crate to allow the ironer to be put to get thru those narrow hallways, tight corners, and doors. Or we can also ship the ironer in pieces and assemble it right in your laundry.

► Intelatrol II

The Intelatrol II goes beyond the standard Intelatrol and automatically turns off the ironer after it has cooled down. Just walk away and your ironer will take care of the rest. No need to worry or waste your time waiting for the ironer to cool down.

► Chromed Cylinder

The heated cylinder can be chrome plated if desired, though not recommended.

► Tropicalized Motors

Electric motor windings are coated with a protective seal

E.T.L. Listed for U.S.A. and Canada

NOTE: Each Model covered in this brochure has a separate Technical Data brochure giving detailed data and dimensions. They can be downloaded from www.ironerpeople.com

Other Models Available from Sharper Finish

We manufacture over 100 different ironer models to meet any of your needs.

Mid Sized Ironers

The Models 1200, 1600, and 2000 are available from 85" (2.1m) to 136" (3.4m) ironing surfaces. These models can be heated by gas, steam, or electricity.

High Production Ironers

The Models 2400, 3000, and 3600 are for large laundries ironing hundreds of pounds per hour.

Built-in Folder Models

The Finish Master 1600, 2000, 2400, 3000, and 3600 are ironers with built-in primary folders. Ironed and folded flatwork can be delivered to the front, or if more production is required, to another operator at the rear.

The IFC 1600, 2000, 2400, 3000, and 3600 models are ironers with built-in primary and cross folders. A stacker and conveyor are also available. These combination units save space and labor while offering many of the features once only available on separate ironers and folders.
