

CMV SHARPER FINISH

## THE OSB OPTION

THE IRONER PEOPLE

June 2010

The **OSB Smooth Fold System** is now available on most Finish Master Ironers with Built-In Accufold primary folders. The OSB provides a crisp and smooth primary fold. The OSB keeps the linen tight as the Finish Master makes the primary folds. The OSB is actually two oscillating bars that flattens folds not only on the front side of the ironer—but also the rear side.

The OSB is available on the Finish Master 2000, 2400, 3000, and 3600.

Please note that the OSB can not be “Field Installed” on existing Finish Masters. The OSB is only available on new Finish Master orders.
